PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re: Nichols *et al.*

Serial No. 10/628,077

Filed: July 25, 2003

For: METHODS FOR THE LATE INTRODUCTION OF ADDITIVES
INTO POLYETHYLENE TEREPHTHALATE

Group Art Unit: 1714

Examiner: S. Acquah

September 3, 2004

Commissioner for Patents
Alexandria, VA 22313-1450INFORMATION DISCLOSURE STATEMENT
UNDER 37 C.F.R. § 1.97(d)

Sir:

In accordance with 37 C.F.R. § 1.97(d) and MPEP § 609, Applicants are submitting the enclosed IDS concurrently with the payment of the issue fee. Applicants are including copies of the requisite information in accordance with Patent Office guidance; as Applicants filed the above-referenced application after June 30, 2003, Applicants are not providing copies of U.S. patents. Applicants request that the Examiner consider the information cited in this IDS and officially make it of record in accordance with the provisions of 37 C.F.R. § 1.97 and MPEP § 609.

In the above-referenced application, Applicants discussed commonly-assigned U.S. Patent No. 5,898,058 for a *Method Of Post-Polymerization Stabilization Of High Activity Catalysts In Continuous Polyethylene Terephthalate Production*. U.S. Patent No. 5,898,058, which Applicants cited in a previous IDS, discloses adding a stabilizer at or after the end of the polymerization reaction and before polymer processing.

U.S. Patent No. 5,898,058 has a European patent counterpart, namely commonly-assigned European Patent EP 0900247. On June 23, 2004, Eastman Chemical filed an opposition against European Patent EP 0900247. Although U.S. Patent No. 5,898,058 and European Patent EP 0900247 are not counterparts to the above-referenced application, the present application recites as one object providing "a continuous process for the production of

high quality polyethylene terephthalate polyester that improves upon the stabilizer-addition techniques disclosed by commonly-assigned U.S. Patent No. 5,898,058." For completeness, therefore, Applicants are disclosing to the Patent Office Eastman Chemical's opposition, as well as the references as provided in this opposition.

Applicants note that Eastman Chemical's opposition cites seven references. Of these, International Publication No. WO 97/44376 (D1) is a counterpart to U.S. Patent Application No. 08/650,291, which issued as U.S. Patent No. 5,898,058. Accordingly, Applicants are not listing D1 in this IDS—D1 is cumulative in view of Applicants prior disclosure of U.S. Patent No. 5,898,058. Likewise, Applicants cited U.S. Patent No. 5,008,230 (D2) in a previous IDS and so are not listing D2 in this IDS.

As required by 37 C.F.R. § 1.97(d), no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the person signing the certification after making reasonable inquiry, no item of information contained in the information disclosure statement was known to any individual designated in 37 C.F.R. § 1.56(c) more than three months prior to the filing of the information disclosure statement.

As further required by 37 C.F.R. § 1.97(d), Applicants are including the fee (\$180) set forth in 37 C.F.R. § 1.17(p). The Commissioner is hereby authorized to charge any additional fees that may be required, or credit any overpayment, to Deposit Account No. 50-0332.

Respectfully submitted,

Richard L. Additon
